

# COZENTUS

## AI-Powered Intelligent Document Processing

Your Launchpad to Digital Transformation

# AI: The Game Changer in Document Automation

In today's digital age, data is extremely important. However, most of the company's data is unstructured, tucked behind words split across multiple documents. This presents a big challenge, requiring a large amount of time and money to collect and analyze.

Intelligent Document Processing (IDP) driven by AI is transforming how we manage documents. By boosting accuracy, efficiency and scalability IDP helps businesses across various industries streamline operations and cut costs. Adopting AI-driven document processing is now essential for any business looking to succeed in today's digital transformation.

According to Straits Research<sup>1</sup>, the current value of the worldwide intelligent document processing industry is expected to surpass \$6 billion by 2027, from a valuation of over \$1 billion in 2021. This suggests that IDP is becoming more and more acknowledged as a key force behind digital transformation.

### Accuracy Like Never Before:

AI-powered document processing solutions are extremely effective at reducing errors. According to a study by Gartner<sup>2</sup>, **AI can increase data accuracy by more than 80%.** This implies that documents are processed accurately each time.

### Efficiency Above Human Capability:

AI is not only intelligent but also highly productive. Forrester<sup>3</sup> predicts that **AI can save up to 70% on document processing times.** For companies trying to remain competitive in a market that is changing quickly this speed, along with flexibility and responsiveness is essential.

### Predictive Analysis

AI is capable of pattern analysis and trend prediction. By implementing predictive analytics into document automation businesses can attain unparalleled levels of efficiency, accuracy and productivity, transforming their document operations. According to McKinsey<sup>4</sup> **companies that use AI for document processing** predictive analysis have witnessed a notable increase in timely strategic planning and decision-making.

# UNDERSTANDING INTELLIGENT DOCUMENT PROCESSING

---

Intelligent Document Processing (IDP) is an AI-powered document processing solution that uses artificial intelligence technologies like Natural Language Processing (NLP), computer vision, deep learning, and Machine Learning (ML) to streamline document extraction, reading, comparison.

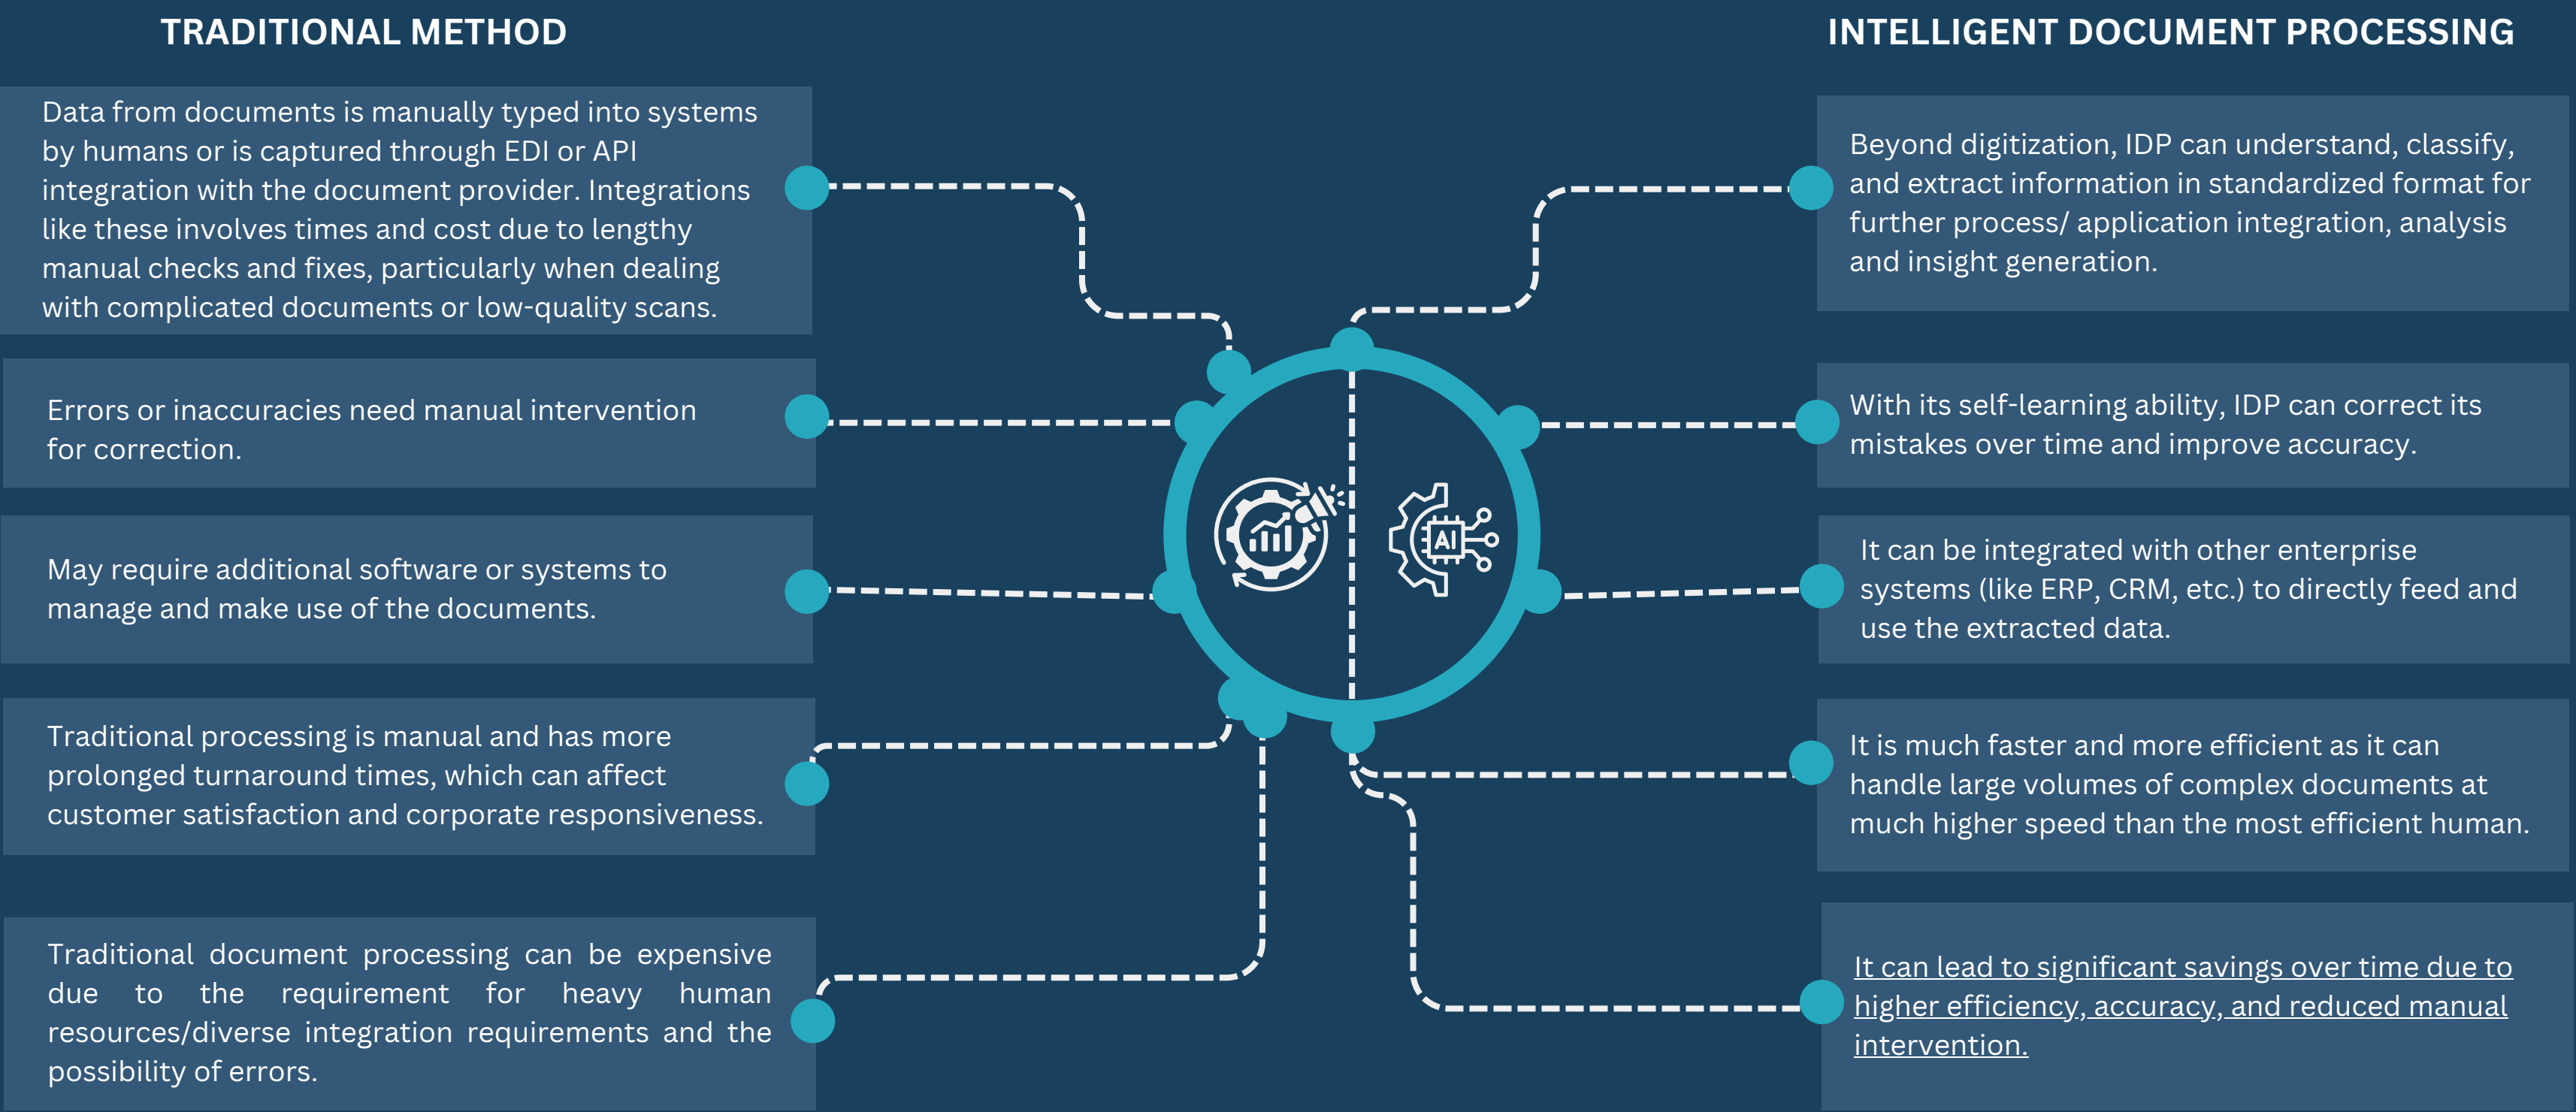

It automates the extraction, processing and analysis of data from various documents, removing the need for manual data entry, minimizing errors, and considerably increasing efficiency. Today, the implementation of advanced AI technologies for IDP automate and improve any document-related processes for any industry.

# HOW IS AI-POWERED DOCUMENT PROCESSING DIFFERENT FROM TRADITIONAL APPROACH?

Regardless of the volume of papers being processed or the size of the business, IDP is flexible and capable of handling the task efficiently. It significantly reduces the requirement for manual labor-intensive document processing and management. Here is the difference between them:

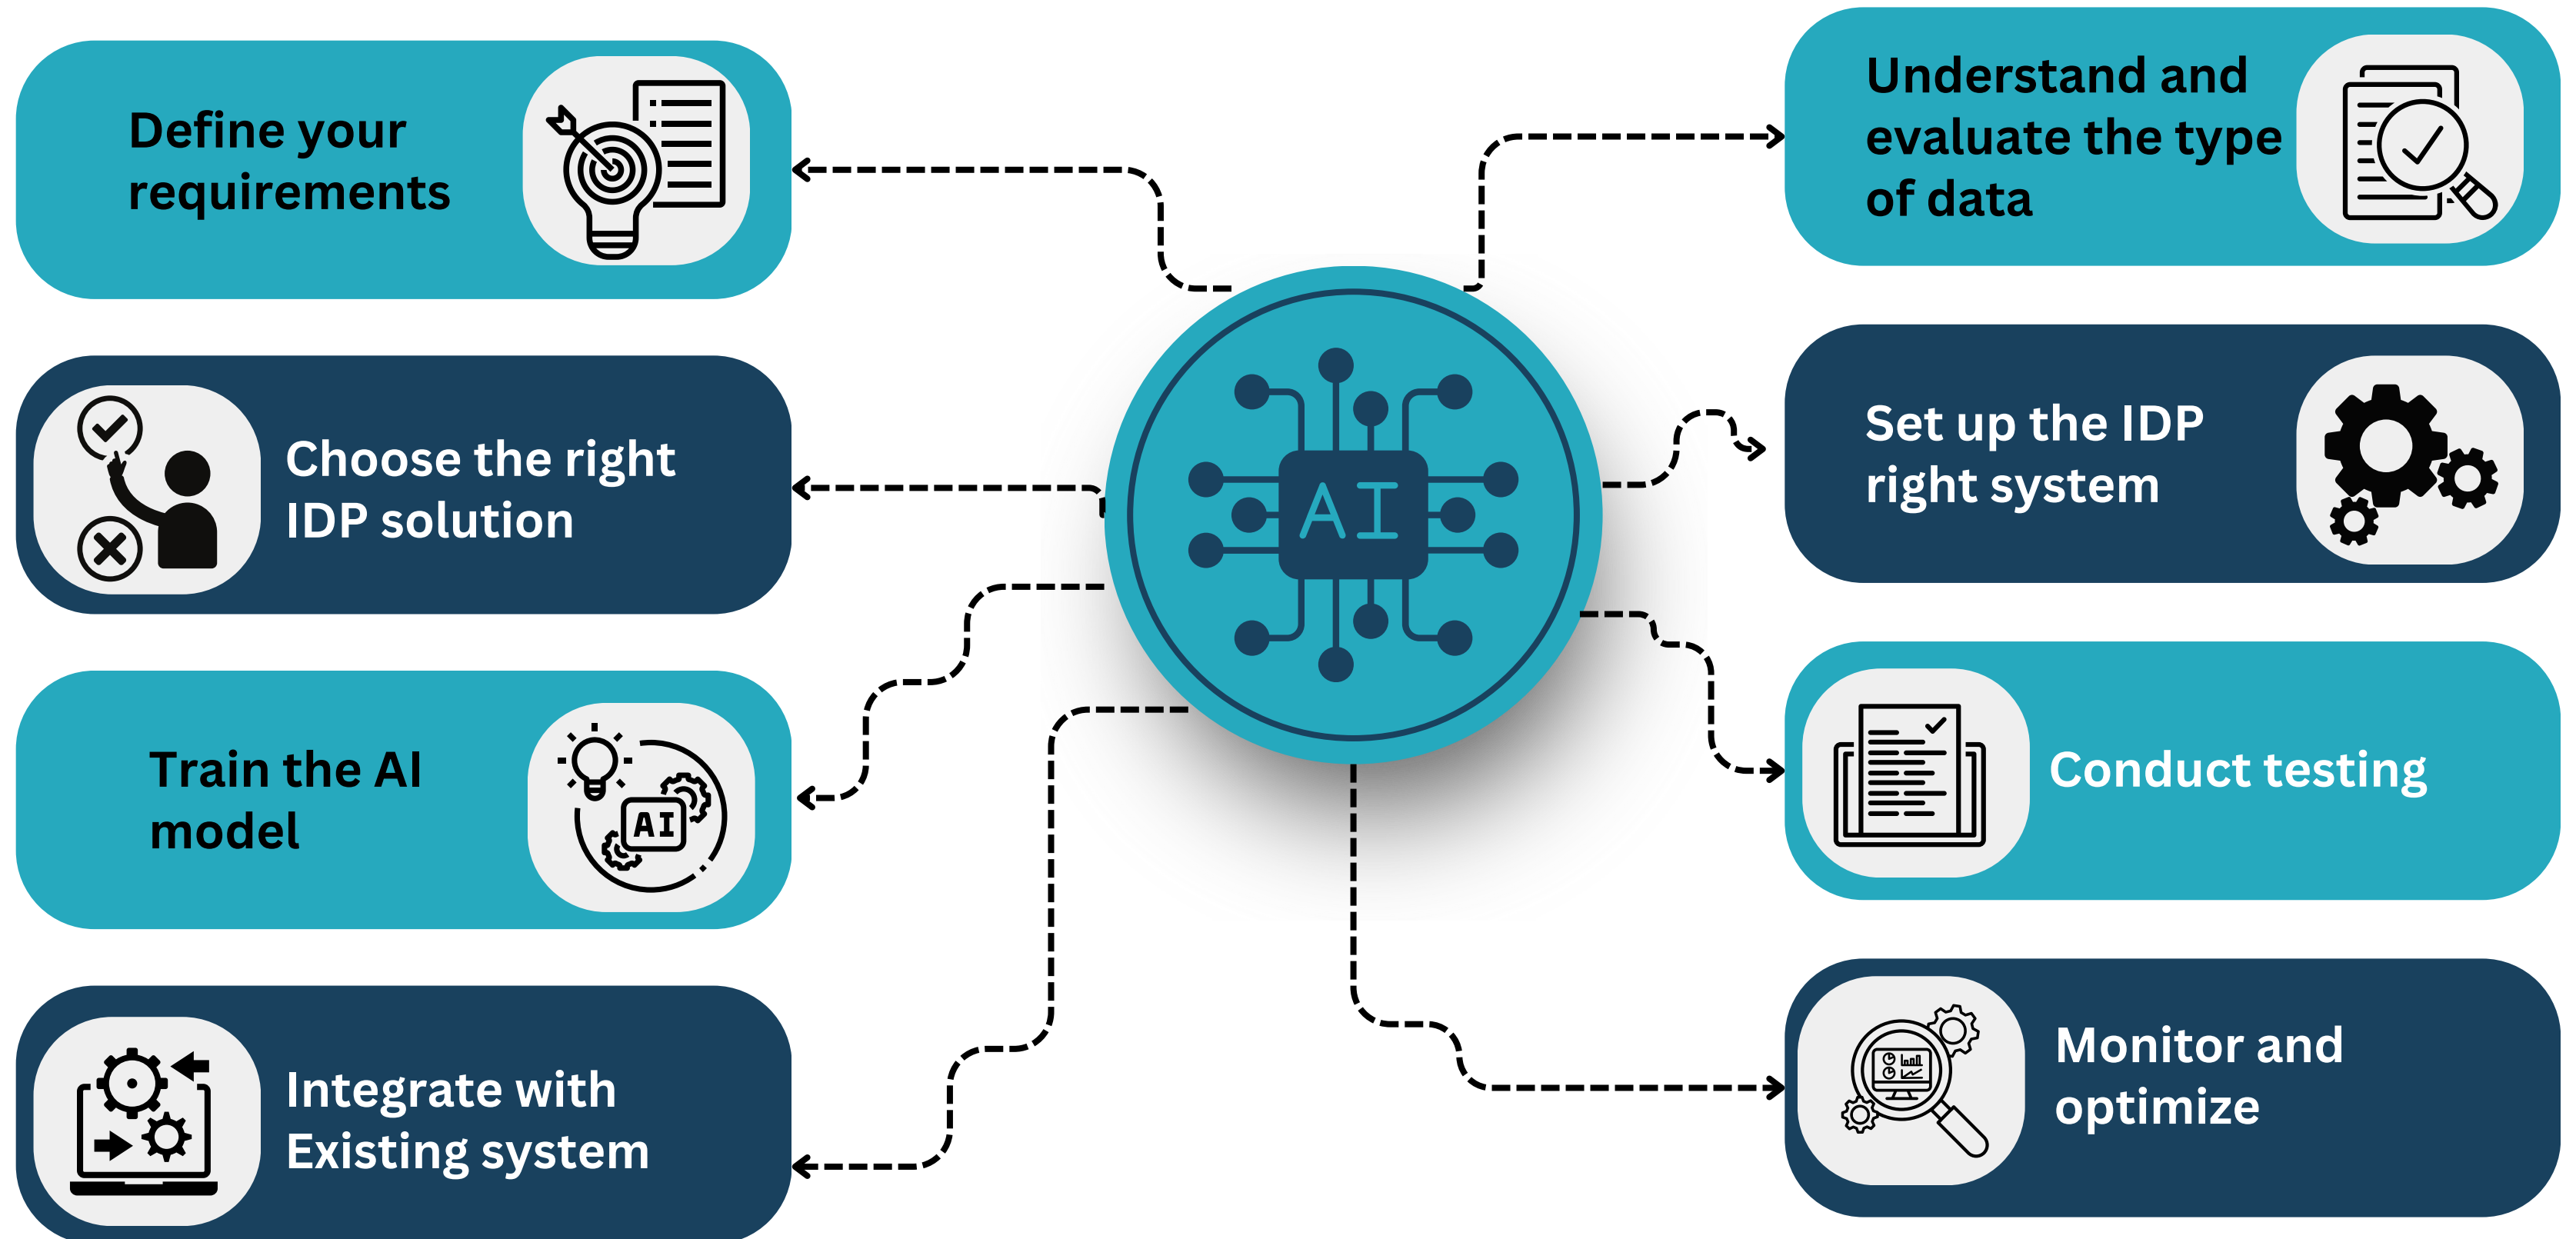

# BENEFITS OF THE IMPLEMENTATION OF INTELLIGENT DOCUMENT PROCESSING

By implementing IDP, you can streamline document processing, minimize errors, and achieve significant cost savings. This, in turn, fosters stronger relationships with vendors and clients, ultimately propelling your business towards its goals.

- 1 **Cost savings-** According to a McKinsey<sup>5</sup> study, automating inventory management can lower inventory levels by as much as 30%, which can result in cost savings and increased productivity.
- 2 **Minimizes human-errors during the process-** According to a KPMG<sup>6</sup> research automation solution, such as IDP, may reduce document processing errors by up to 85%.
- 3 **Improved data compliance-** According to a Deloitte<sup>7</sup> survey, 63% of companies reported that using automation and IDP technologies supported compliance management.
- 4 **Increased Efficiency and Productivity-** According to IBM's<sup>8</sup> AI and automation study, automating repetitive document processing operations can boost productivity by up to 50%.
- 5 **Improvement in client satisfaction -** According to a Capgemini<sup>9</sup> analysis, customer satisfaction can rise by 10% to 15% when intelligent automation is implemented.

## STEPS TO IMPLEMENT IDP IN YOUR BUSINESS

---

## 01

**Banking** - Automate loan application procedures, scan paper records, and gather information from bank accounts and invoices.

---

## 04

**Insurance** - Enhance fraud detection, automate the processing of claims, and gather data from insurance papers.

---

## 07

**Retail** - Automate supplier invoices, inventory management and regulatory compliance and reporting for audits.

---

## 08

**Human Resources** - Streamline the onboarding process for new hires, handle resumes and job applications, and retrieve information from HR forms.

---

## 02

**Healthcare** - For increased accuracy and quicker invoicing, digitize patient records, handle insurance claims, and extract data from medical forms.

---

## 05

**Manufacturing** - Automate activities that require a lot of paperwork, such as quality control, invoice processing, and supply chain management.

---

---

## 03

**Logistics & supply chain** - Automate shipping manifests and bills of lading, customs declarations, delivery receipts and proof of delivery and Inventory management.

---

## 06

**Accounting and Finance** - Accelerate tax filing and audits by automating financial report analysis, cost management, and invoice processing.

---

# IDP applications can significantly enhance the value of your business.

Our custom intelligent document processing solution is designed to seamlessly extract and organize data for logistics and supply chain business functions.

# COZENTUS IDP SOLUTIONS

Today companies face a daunting task handling any documents arriving in various formats, various layouts and structure, and from different parties. Processing these documents consumes resources, time, and is prone to mistakes thus disrupting operations and straining business relationships. Our bespoke solution automates the processing of these documents extracting structured data, processing of the extracted data and integrating with forward systems.

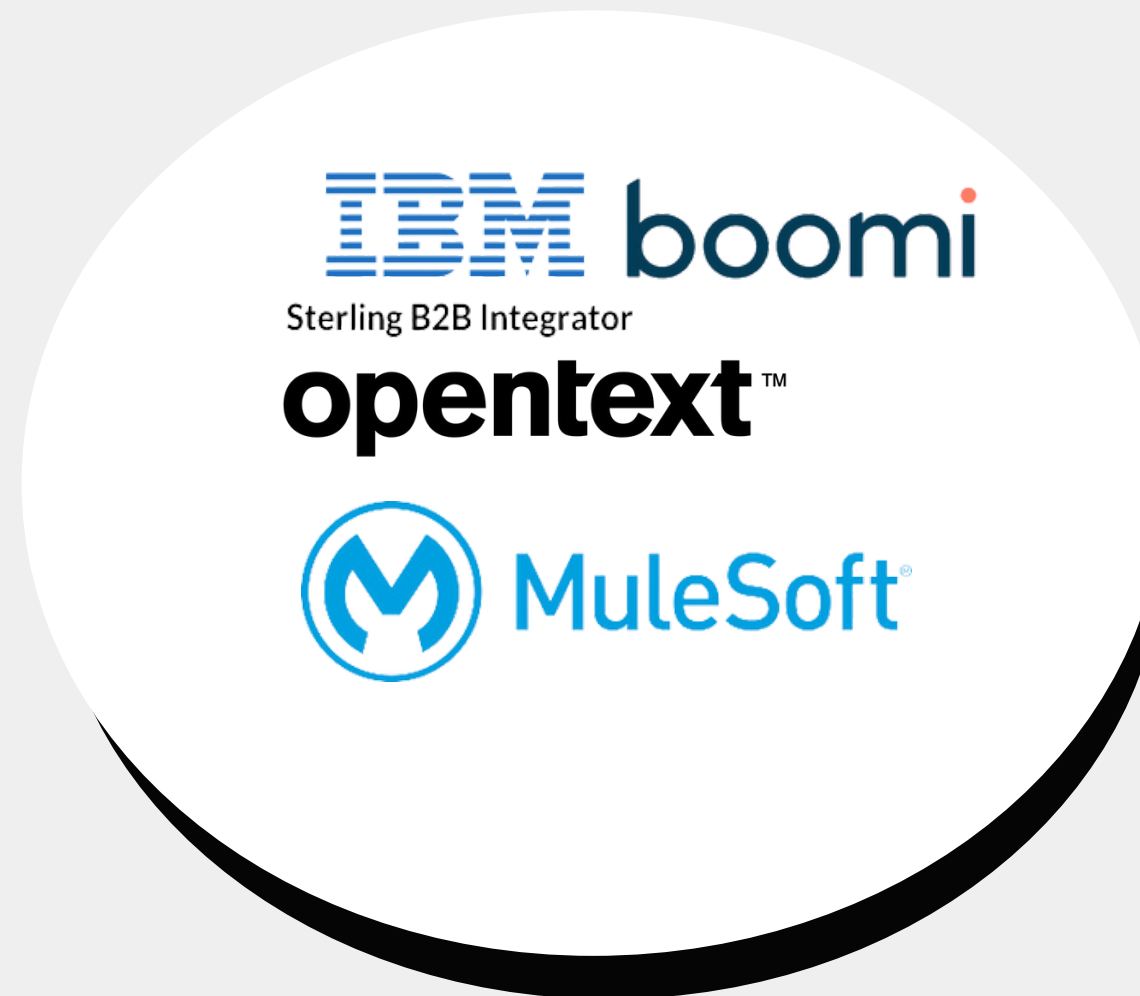

# OUR TECHNOLOGY SUITE

Our development team embraces a fast and agile technology-agnostic approach, that focuses on best-in-class, latest and advanced tools and frameworks. Some of these include:

## ETL AND DATA MANAGEMENT

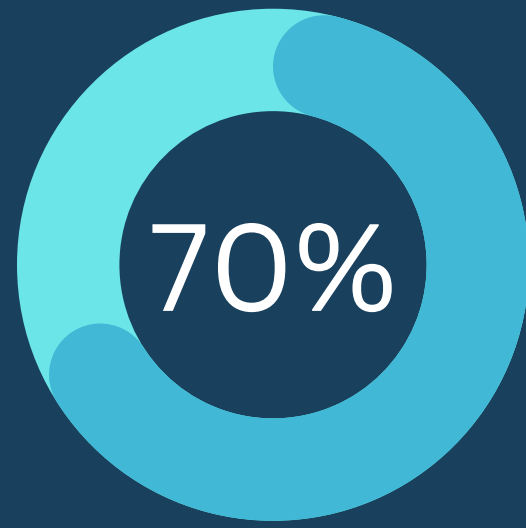

## ENTERPRISE INTEGRATION

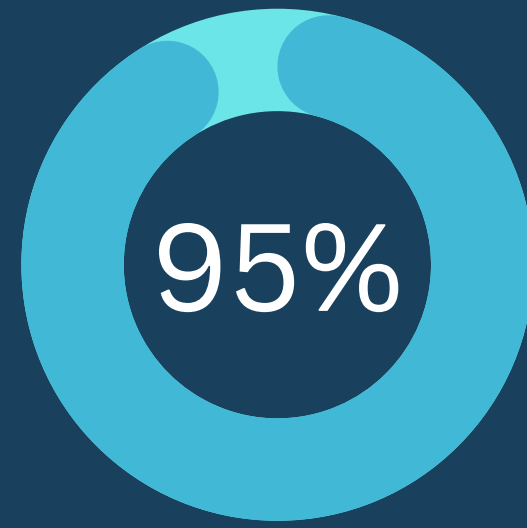

## AI AND MACHINE LEARNING

70% data errors  
reduction

95% data-level  
accuracy without the  
need for manual  
intervention

Upto 80% manual  
cost reduction

5 times faster data  
processing

## What solutions can we offer?

We revolutionize supply chain and logistics document processing with expert insights and experience. No matter the document type – bills of lading, invoices, shipping instructions, purchase orders, custom documents, SLAs – you name it, we can handle it. Our solutions are highly customizable, ensuring a perfect fit for your specific needs.

# COZENTUS ADVANTAGE

**01**

80% of invoices now require minimal to no manual intervention.

**02**

Extracted data is automatically posted to the Accounts Payable system, saving time and resources.

**03**

The solution handles inter-BU invoice processing efficiently.

**04**

Invoice processing time has been reduced to 90%.

**05**

Automatic data extraction minimizes errors by 50%.

**06**

The solution easily adapts to new invoice formats and changing requirements.

**07**

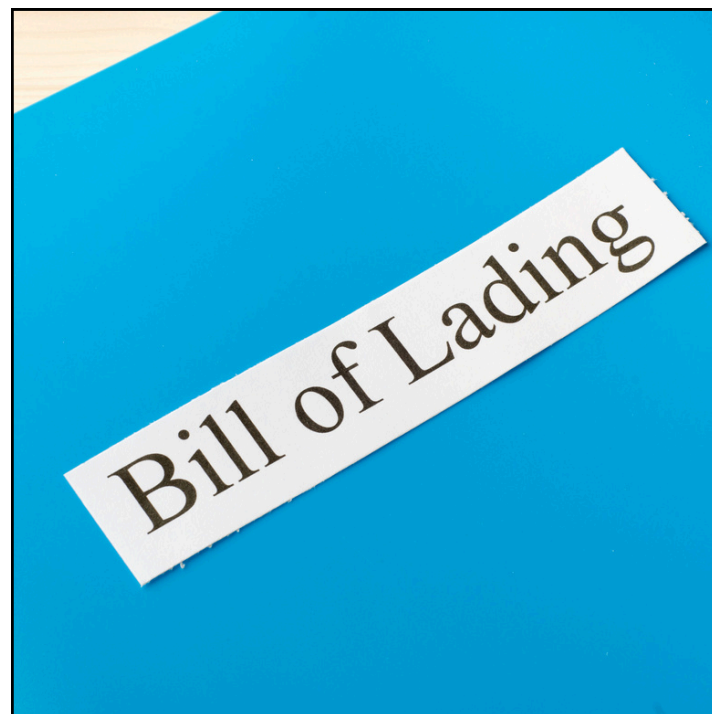

Improved Collaboration between stakeholders.

# COZENTUS IDP USE CASES

Cozentus has been at the core of supply chain and logistics operations for decades, assisting clients in realizing the full potential of their people, processes and technology and collaborating to yield real-world outcomes.

We have automated tasks such as logistics document comparisons, compliance checks, invoice data extraction, contracts vs service comparisons, accounts payable posting and more.

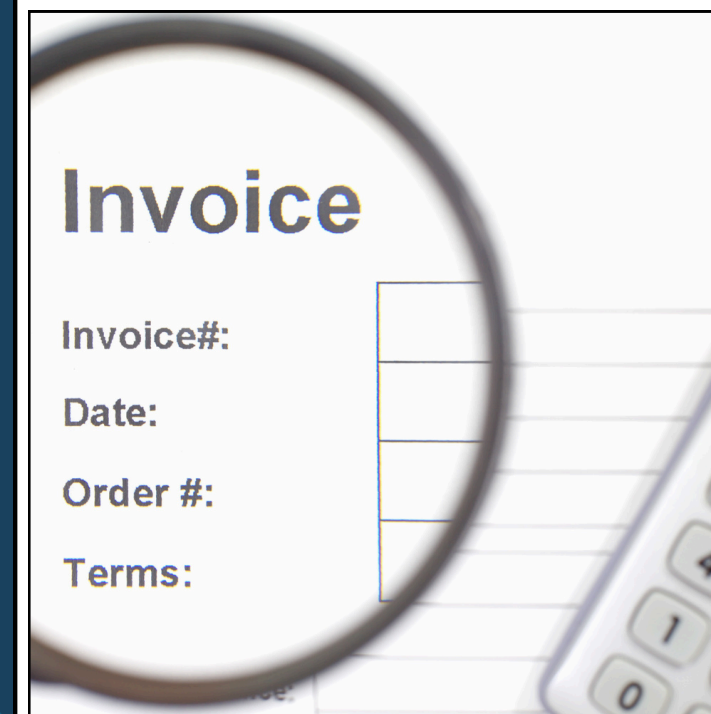

## Comparing draft Bill of Lading with Shipping Instructions

Advanced Shipping Note and communication with carriers till approval of the draft

Conducting comprehensive audit of export documentation to ensure compliance and minimize errors.

Extraction of data from Invoices submitted by vendors and integrating with forward ERP systems

Automating freight audits by comparing invoices with GRN/ PO and post accounts payable

# HEAR ABOUT OUR CLIENT'S SUCCESSIONS!

“Since implementing Cozentus Technology's Document Data Extraction, our workflow has become more efficient, and we've seen a significant reduction in errors.”

– *Leader at a global 3PL* ★★★★★

“With Cozentus application, comparing draft Bill of Lading with Shipping Instructions/Advanced Shipping Note and communication with carriers till approval of the draft is now fully automated. Our vendors are also happy.”

– *Logistics head of a global 3PL* ★★★★★

“Before Cozentus, managing our documents felt like an endless battle. Now, with the bespoke solution provided by Cozentus, conducting comprehensive audit of export documentation to ensure compliance and minimize errors has become easy.”

– *Shipping manager at Port operations*

“The integration was seamless, and the support from Cozentus has been exceptional. Extraction of data from invoices submitted by vendors and integrating them with forward ERP systems is now a smooth and fast process.”

– *Supply chain lead of a Global Shipping and logistics company*

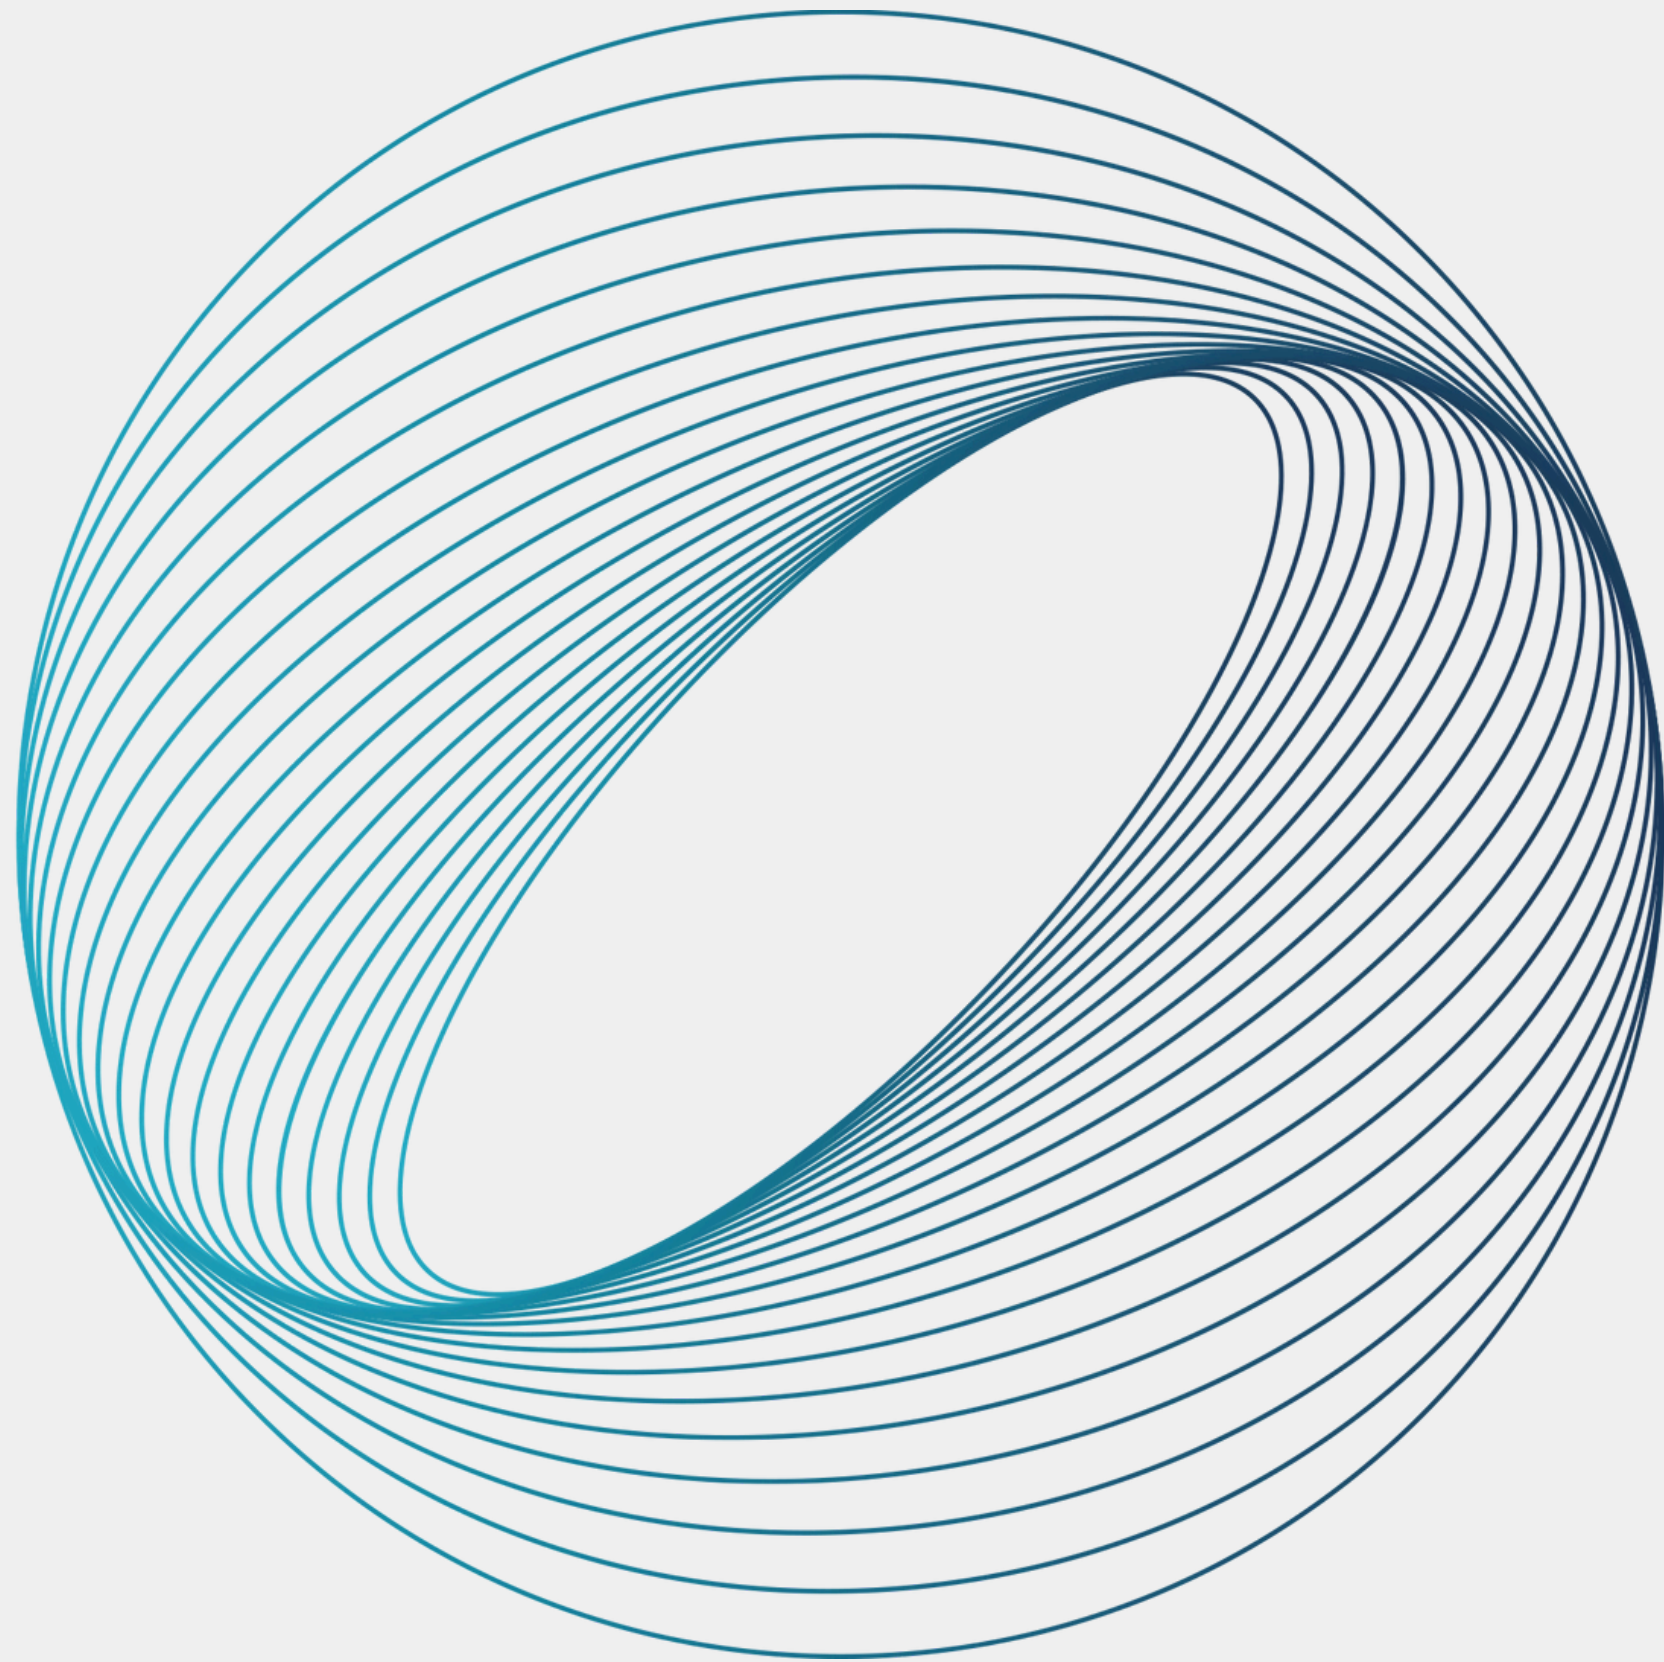

# What sets us apart?

- We build intelligent solutions for data-driven businesses to automate their document processing operations and integrate these innovations to unlock new levels of efficiency and productivity.
- We prioritize with a culture of commitment to corporate quality, anchored in transparency.
- Our team brings a collective 600+ man years of senior management experience in crafting IT solutions that optimize supply chain and logistics operations, aimed to enhance customer satisfaction.
- Choosing us ensures top-notch quality, unmatched responsiveness, speed, high levels of accuracy and agility.
- Our tech-driven applications guarantee high business value and ROI.

# COZENTUS

Empowering your supply chain and logistics businesses through innovation and efficiency.

Need more information or have a question for our experts? Feel free to reach out to us. We'd love to discuss more!
